

About the Facility

CRF is a consulting facility providing professional cultural resources management services to federal, state, and local agencies, Northwest California Tribes, and private individuals.

CRF has completed numerous projects treating archaeological and historic resources in the Northern California region, and has also coordinated and managed a wide variety of projects throughout the Pacific northwest, and the Great Basin for more than 15 years.

Cultural Resources Management

The CRF's cultural resources management staff, including archaeologists, architectural historians, and other specialists, provide a wide variety of consulting services to meet client needs. We specialize in project compliance with historic preservation laws and regulations under federal, state, and local jurisdiction. Our staff is experienced in the full range of historic specialties, and each of our principal staff meets the Secretary of the Interior's Professional Qualifications (36 CFR 61) in their respective disciplines. The CRF staff has completed a broad range of studies to meet the cultural resource management requirements of the following regulations:

- Sections 106 and 110 of the National Historic Preservation Act (NHPA)
- California Environmental Quality Act (CEQA)
- Various local laws and regulations pertaining to the protection or preservation of significant archaeological or historic resources.

Our cultural resources management professionals have provided consulting services for a variety of projects.

CRF undertakings include:

- Telecommunication Facilities
- Federal and State Capital Improvement Projects
- Pipelines
- Highways
- Wetland Mitigation
- Stream Restoration

Heritage Management

Cultural resources are considered to be an important component of fostering a sense of national identity and shared experience. As a result of federal, state, and local preservation legislation, planned projects may require an evaluation of impacts to prehistoric or historic archaeological sites. CRF's qualified archaeologists and our extended network of related specialists can provide support for a variety of projects, including:

- Phase I Identification Surveys
- Phase II Evaluation Studies
- Phase III Data Recovery/Mitigation Projects
- Cultural Resources Management Plans
- Archaeological/Tribal Monitoring
- Public Education and Outreach

Historical Research

Documenting, preserving, and/or mitigating effects to historic resources are important considerations during project planning. The CRF has extensive experience in helping clients navigate through the historic preservation compliance process, whether it involves federal, state, or local regulatory oversight. Our services in historic preservation and architectural history include:

- Sections 106/110 Implementation
- NEPA Implementation
- Historic Architectural Identification and Effects Determinations
- National Register of Historic Places Nominations
- Traditional Cultural Property Evaluation
- Integrated Cultural Resource Management Plans
- Development of Historic Contexts
- Historical and Archival Research
- Impact Planning/Mitigation Planning

CRF is dedicated to satisfying client needs with innovative and practical solutions completed in a timely cost effective manner.

All personnel meet the professional standards described in The Archaeology and Historic Preservation: Secretary of the Interior's Standards and Guidelines.
